

*[As a Moderator]*

My experience as a Moderator in the Life Long Learning program was very positive! First of all, because I chose the subject, preparation was easy and fun. And the participants themselves brought so much to our sessions—interesting ideas, their own experience, material that they had looked up on the subject, etc,—that the time flew by! If there was any downside (from my point of view) it was that there were too few sessions—only three for this particular offering—to really get into the possibilities offered by the subject. I'd really enjoy doing another, longer, one!
